Our Commitment to Environmental Sustainability

Our goal is to improve the quality of our lives by supporting sustainability, innovation and continuous growth. All raw materials are made in Europe with main sources being Italy and France. All of our products are commercial quality with respect to two equally important points: design/aesthetic and resistance, which insure sustainability. All production processes emphasize on material consumption in order to optimize resources and waste management, protect consumers' and employees' health, and prevent fires.

- 1. All wood materials come from FSC® C114358 certified forests.*
- 2. Wooden components are 100% recyclable.*
- 3. All plastic materials are made of high-quality raw materials and are recyclable and eco-compatible.*
- 4. Polyurethane foam can be recycled through advanced mechanical machining processes becoming fuel.*
- 5. 90% of shipping materials are recycled and reused, such as pallets and cardboard boxes.*

Since 2017, we have been using water-based finishes, varnishes, adhesives and fire-retardant components that allow us to keep high quality while significantly reduce CO₂ emissions.

Afra strives to protect the environment and to lead lives to respect nature with its production and consumption habits.
